**20" Rubbish Chute  
Top Hopper**

Top 26" (650 mm)  
Bottom 16" (400 mm)  
Height 44" (1100 mm)

**Rubbish Chutes** (also known as rubble chutes - rubbish disposal chutes - construction chutes & high level building waste chutes) make the ideal system for transporting debris from various levels of a structure to ground level.

The range of Rubbish Chutes are blow moulded from High Density Polyethylene to give superior abrasion resistance and are fitted with steel brackets and permanently secured chains which are tested to 1000Kg.

Top Hopper *Rubbish Chutes* feature a wide open top which act as a guard against falling debris.

Side-Entry hopper sections fit into your rubbish chute system allowing workers to dispose of rubbish down the chute at different level of the scaffolding.

Rubbish Chute support frames for scaffold frames
